

THE DAILY and WEEKLY HERALD has more than double the circulation of any other paper published in Southern California. Business men recognize it accordingly as the best advertising medium South of San Francisco.

WEDNESDAY,.....DEC. 1, 1875.

NEWS OF THE MORNING.

Mrs. M. Stinson, a widow lady residing at No. 418 Polson street, San Francisco, fell off an awning on Monday and was so severely injured that she died in two hours.

On Monday evening Mr. Samuel H. Bernhart, of the firm of Ellis & Bernhart, merchants on Clay and Sansome streets, San Francisco, died suddenly in convulsions at his residence, corner of McAllister and Laguna streets.

The officers of the Virginia City Relief Fund in San Francisco say that morbid is needed, owing to the severe weather in Virginia City. The late storm on the Northern coast was the most severe in ten years. About a dozen vessels are reported wrecked.

The Hudson river is frozen over at Albany, and our Eastern dispatch report severe weather generally prevailing. Here the surrounding hills are covered with verdure, the roses are in full bloom, and honeysuckles perfume the air with their fragrance.

The Royal Geographical Society of England eulogizes Stanley for his African explorations.

We have received the first number of the Riverside News, published by I. Buck & R. A. Davis. It is a twenty column paper presenting a neat appearance and is crammed full of local news. The News is a credit to Riverside and we wish it every prosperity.

The Evening Post of San Francisco has changed managers, editors and politics. Mr. HENRY GEORGE editor, Mr. W. M. HINTON, manager and the Democracy, if there ever was such a thing in the sheet—stepping down and out, and Mr. J. T. GOODMAN, Mr. SAMUEL SEABOUGH and "Republican principles," taking the places made vacant by the retiring trio. Mr. GOODMAN is to become editor-in-chief and general manager, and Mr. SEABOUGH principal writer. Mr. GOODMAN is a brilliant and polished writer. His pen and management made the Territorial Enterprise the leading journal of the State of Nevada and one of the influential papers of the Pacific Coast. Mr. SEABOUGH is too well known as a journalist to need extended notice. As a political writer he has few equals here or elsewhere. It was his pen that made the Sacramento Union the most powerful political journal in the State. With such men to control and edit, the Post will soon become an excellent paper and an influential exponent of Republican principles.

Well Said.

Some days ago the HERALD pointed out the weakness of our so-called Agricultural Fair, and endeavored to show that something else besides horse racing was necessary to render it popular with the people. In this connection the following sarcastic remarks from the San Diego Union are not inappropriate:

The races at Los Angeles appear to be progressing—thereby promoting the interests of agriculture in a corresponding degree. We have endeavored for a long time to get the statistics showing the increased production of pumpkins and potatoes through the instrumentality of these races—namely in Los Angeles but elsewhere, and the results of our researches thus far are very unsatisfactory. Is it not about time for "trials of speed" to be held as such, and not under the guise of agricultural fairs? For our part, the only possible excuse we can find for these agricultural races is the quaint old couplet:

He who by the plough would thrive,
Himself must either hold or drive.
Exchange the sulky for the plough and the "trials of speed" might perhaps promote the interests of agriculture.

The Great Scheme.

The long talked of and highly inflated Tom Scott railroad convention, which met at St. Louis a few days since, has made its speeches, "resolved" and adjourned sine die. That is to say, the manipulators adjourned from St. Louis to the lobbies at Washington, where they have gone to do all in their power and all in the power of money to push through a bill which, if it succeeds, will cost the people of the United States more than double the amount necessary to build a double-track road from the side of the continent to the other. The resolutions adopted by the convention were drawn up with an eye single to the interests of Tom Scott's Texas Pacific scheme, and government aid is invoked with an earnestness worthy of a better cause. No bill ever before Congress was more strongly supported by the lobby than will be this bill this Winter. The people of the South have been deceived and hoodwinked as to the purpose of the managers of the Texas Pacific. They have been made to believe that the road will be a Southern road in fact as well as in name, and their representatives in Congress will support the most extravagant proposition that Scott may make. The scheme is to use the Government's credit in an indirect way to the extent of probably \$40,000 per mile of the road. But however indirect the process by which it will be attained, in the end the people will be compelled to pay both the interest and the principal of the bonds issued. We are told in a sort of patronizing way that the Government is only asked to become security for the payment of the interest on these \$40,000 per mile bonds, and as a guarantee for the repayment of the interest, the Government is to have the first mortgage bonds on the road. The bonds are to be sold of course, but as the purchasers must accept the second mortgage as security for their payment, it seems doubtful if capitalists can be found willing to invest their

money on such insufficient collateral. Congressmen and the people may rest assured that however fair and plausible the bill may appear on its face, it will have a hidden meaning which implies nothing more nor less than the holding of the Government for the payment of all the bonds issued. It is hardly probable the bill which this St. Louis Convention was called to support will pass, but if it should the people will be victimized to the tune of millions and millions of dollars. The Southern Overland road will be built sooner if Scott's bill is defeated than it will if the great subsidy scheme succeeds.

Mutual Aid—All Benefits Paid in Full.

The Southern California Mutual Aid Association has lost but four members since its organization in November, 1873. Every benefit has been paid in full. The last two deaths occurred about the first of September, and the proofs of death were in so that assessments were levied due October 9th and delinquent in thirty days. After which time members still had thirty days longer in which to pay, by adding a small fine for delinquency. The assessments have been very promptly paid, as we are informed by the Secretary, notwithstanding the tightness of the money market and the call for money to pay taxes now being made. The following certificates are evidence that the Association has been prompt in settling with the relatives of deceased members:

SAN BERNARDINO, Nov. 26th, '75.
To the Officers and Directors of the S. C. Mutual Aid Association: GENTLEMEN—It is with pleasure that I acknowledge the receipt this day of the benefit due my daughter, Ellen O'Connell, on the death of her father, John P. O'Connell, who was drowned off Catalina Island on the 3d day of September, 1875, and who was so fortunate to have a Life Membership in your Association. One-fourth of the benefit was received by me as soon as proof of death was presented, and the remainder was received this day. The benefit amounted to \$882, which, with \$6.10 due him on his agency account, was promptly paid. I hereby desire to express my gratitude on behalf of the orphan child for the kindness shown me by your officers and the promptness with which this claim has been paid.

ELEEN M. O'CONNELL, Guardian.
LOS ANGELES, Nov. 30, 1875.
To the Officers and Directors of the S. C. Mutual Aid Association: GENTLEMEN—I hereby acknowledge the receipt of the benefit due me on a certificate of membership held in your association by my wife Ellen Molony, lately deceased, the amount of said benefit being \$882.00, one-fourth of which amount was paid with accrued dividends on the proof of death, and the balance this day in gold coin. I most heartily endorse and recommend your association as the cheapest mode of life insurance extant.

R. MOLONY.
The Association is gradually increasing in membership, and is to-day stronger than ever.

Artesian Well Boring.

Everything relating to the development of our water supply is particularly interesting to those of our citizens who are obliged to resort to artificial means to get it. But the prevalence of boulders and the want of machinery to go through them have hitherto been the great obstacles in the way of deep well boring, though there is little doubt artesian water can be had almost anywhere in the valley. Everybody wants an artesian well, but few care to risk their time and money when a stray boulder might cause the loss of both. Hence it is with pleasure that we learn that Mr. J. H. Pierce, who has been boring deep wells for the Central and Union Pacific Railroad Companies for the last eight years, and has besides a reputation throughout the State as a successful operator, intends locating among us, and in company with one or two other experienced men, proposes to carry on the well business in all its branches. Having tools for both surface and artesian wells, and steam power to work them, rocks and boulders will be thoroughly "pierced" whenever encountered. We have no doubt Messrs Pierce & Co. will have their order book well filled by the time they are ready to commence operations. We wish them every success.

A New Railroad Agent.

Mr. John W. Straun, late with Lips, Craigie & Co., has been appointed agent of the Los Angeles and Independence Railroad in this city, and the appointment is one of the best that could have been made. Mr. Straun, though a young man, has had ten years' experience in railroad agents and telegraphing. He was several years railroad agent in the East, and a three years on this coast. Was construction of the telegraph line to San Diego, and at that point. Afterwards he was Superintendent of the Military line to Arizona and discharged his duties with great ability. As the representative of the Los Angeles and Independence Railroad at this point he will be deservedly popular with our business men and his geniality and business qualities will make warm friends for his road.

Leaving Us.

On Saturday next Dr. Abern will leave this city for San Luis Obispo, where he will remain a few days and then return to his home in San Francisco. The Dr. has been with us several weeks and during his stay has alleviated the ills of many. We have before us the affidavits of a number of persons who swear that he has cured them of diseases from which they had despaired of obtaining relief. We have personally talked with a half-dozen gentlemen each of whom has assured us that Dr. Abern either cured or relieved them of complaints that no one before him had cured. The man who makes two diseases a specialty and stands for years cannot but become familiar with the ills and remedies. A short study of his life and it is not remarkable that he has mastered them.

Latest Telegrams.

BY ATLANTIC AND PACIFIC LINE.

[SPECIAL TO THE HERALD.]

PACIFIC COAST.

For Los Angeles.

CALIENTE, Nov. 30.—The following passengers for Los Angeles left on the Telegraph Stage line to-day: N. Martin and Mrs. Wm Todd.

Stage Robbed near Caliente.

CALIENTE, November 30th.—The telegraph stage was stopped to-night by foot-pads two miles from Caliente. Wells, Fargo & Co.'s box was taken, but the passengers were allowed to go free.

EASTERN NEWS.

Cold Snap.

NEW YORK, Nov. 30.—The weather to-day is the coldest yet experienced here this season. The air is sharp and biting, and a bitter wind prevails. The cold is felt more intensely from the sudden change since yesterday. The thermometer was forty degrees above zero; but last night it had fallen to 25 above; at 9 A. M. it dropped to 10, and is still falling.

The Hudson River Frozen.

ALBANY, N. Y., Nov. 30.—This morning was the coldest of the season. There are reports from the suburbs that the mercury stood ten degrees below zero. At 7:30 this morning the thermometer indicated four degrees below zero. The river is filling with ice from the shores. It is solid for a distance of forty or fifty feet towards the center. Boats are moving with great difficulty. The ferry-boats slips are filled with ice, and it is impossible for the boats to make their trips. A report from Rome says that the ice in the canal is thick, and from all points the reports are that the canal is solidly frozen over.

The Weather in Canada.

QUEBEC, Nov. 30.—No further news from Rome. The quantity of ice in the harbor is rapidly increasing. The snow is over three feet deep in the woods. The thermometer is 20 degrees below zero.

Opening of a Severe Winter.

CHESTER, N. H., Nov. 30.—The wind all day yesterday blew a perfect gale, and a number of chimneys were blown over, but no one seriously injured. Last night was the coldest of the season. The thermometer at midnight was five degrees below zero. Three inches of snow fell Sunday night. Sleighting in the country is good. At sunrise to-day the thermometer was 12 degrees below zero. Reports from the northern part of the State say that the weather is extremely cold, from 15 to 20 degrees below zero.

New City Inhabit to a Large Estate.

CINCINNATI, Nov. 30th.—Covington, Ky., is excited over the appearance of a new city. The large estate left by George Stacy, deceased, was married in England and had six children as the result of the union. He applied for a divorce from his wife, who had been dissipated, and with the little child ran to America. After a lapse of some years, supposing himself to be divorced, he married again. At his death he left the bulk of his estate to the second Mrs. Stacy. The children then upon sent to England and had secured made for her mother, found and brought her here, and claim, it is further discovered, that no divorce was ever granted. This complicates the right of the second Mrs. Stacy, and leaves things nicely tangled for interesting litigation.

Cold Weather in the East.

BOSTON, November 30th.—The mercury here touched zero this morning, and in some localities went several degrees below. In the suburbs the range was from two to four degrees below. The wind blew a gale from the North. The fierce winds have driven off all vessels from shore, and no sailing vessels arrived to-day.

COLUMBIA, N. H., Nov. 30.—The cold snap has been very severe in this district. In many localities the mercury fell to 10 degrees below zero.

NEW YORK, Nov. 30.—The weather to-day is still piercing cold with high wind. The thermometer is verging on zero.

CONDENSED TELEGRAMS.

Rain was falling in large volumes at San Francisco, Chico and Red Bluff, yesterday.

Summers' oil works in Brooklyn, N. Y., burned yesterday. Loss \$50,000.

A serious fire is reported at Melrose, Mass.

A fire at Belleville, Ont., destroyed 20 engines and 18 tenders.

F. M. Rice and J. M. Wallace are appointed Internal Revenue storekeepers for the First California District.

Edward S. Toby has declined the Commissionership of Indian Affairs.

The whisky frauds are still undergoing investigation at St. Louis. A telegram from Gen. Babcock, Private Secretary of Gen. Grant, to McDonald, one of the trickey officials, has been unheeded.

Rev. Dr. McLaren will be consecrated Bishop of Illinois on December 8th.

Dan W. Munn, late Supervisor of Internal Revenue at Chicago, has been indicted for fraud. He says he is innocent, and that it is the work of the St. Louis whisky ring, whose rascals he has exposed.

San Diego Items.

[From the World of the 29th.]

Mr. Lo was on a rampage this morning. Mr. Lo was a little drunk—just a little. Mr. Kerrin tackled him on the harbor side, and a Spaniard on the starboard, and with difficulty plucked him to the crib. He was on the pull-back, and bucked worse than a bronco; but he went in.

In the beautiful little valley of Calhulla, in this county, there is a remarkable spring. The water is as clear as crystal and comes bubbling up from a fissure between two ledges of rock. There is nothing strange about this, except that every time the water gushes up it brings with it charred bark and small pieces of the trunks of trees, manzanita balls, and the roots of a bush called dagger feet. Small bones and fish scales have also been found. When the charred embers, or fire coals, as they are generally called, are taken from the water they are quite soft, and easily mashed or broken; but on being left in contact with the air, they become quite hard, and when cut with a knife present the same appearance as those taken from the fire. Many connoisseurs have been made as to their probable origin, and the manner in which they came there. But so far no inference has proved satisfactory.

In the beautiful little valley of Calhulla, in this county, there is a remarkable spring. The water is as clear as crystal and comes bubbling up from a fissure between two ledges of rock. There is nothing strange about this, except that every time the water gushes up it brings with it charred bark and small pieces of the trunks of trees, manzanita balls, and the roots of a bush called dagger feet. Small bones and fish scales have also been found. When the charred embers, or fire coals, as they are generally called, are taken from the water they are quite soft, and easily mashed or broken; but on being left in contact with the air, they become quite hard, and when cut with a knife present the same appearance as those taken from the fire. Many connoisseurs have been made as to their probable origin, and the manner in which they came there. But so far no inference has proved satisfactory.

PROCLAMATION.

Chicago & Northwestern Railway

The Popular Route Overland

Passengers for Chicago, Niagara Falls, Philadelphia, New York, Boston, or any point East, should buy their

TRANSCONTINENTAL TICKETS

—THE—

Chicago and Northwestern

Railway.

THIS IS THE BEST ROUTE EAST.

Its track is of STEEL RAILS, and on it has been made the FASTEST TIME that has ever been made in this country. By this route passengers for points East of Chicago have their choice of the following lines from Chicago:

BY THE PITTSBURG, FORT WAYNE AND CHICAGO AND PENNSYLVANIA RAILWAYS.

3 THROUGH TRAINS DAILY, with Pullman Palace Cars through to Philadelphia and New York on New York City.

BY THE MICHIGAN CENTRAL, GRAND TRUNK, GREAT WESTERN AND ERIE AND NEW YORK CENTRAL RAILWAYS.

3 THROUGH TRAINS DAILY, with Pullman Palace Cars through to New York, Buffalo, Rochester or New York City.

BY BALTIMORE AND OHIO RAILROAD.

2 THROUGH TRAINS DAILY, with Pullman Palace Cars for Newark, Zanesville, Wheeling, Washington and Baltimore with out change.

This is the SHORTEST, BEST and only line running Pullman Palace Cars, connecting with Union Pacific Railroad at OMAHA and from the WEST via Grand Junction, Marshall, Cedar Rapids, Clinton, Sterling and Dixon, for CHICAGO AND THE EAST.

This popular route is unsurpassed for Speed, Comfort and Safety. The smooth, well-balanced and perfect track of steel rails, the elevated Pullman Palace Sleeping Cars, the perfect Telegraph system of moving trains, the regularity with which they run, the admirable arrangement for running through cars to Chicago from all points West, secure to passengers all the comforts in modern railway traveling. No changes of cars and no tedious delays at ferries.

Passengers will find tickets via this favorite route at the General Ticket Office of the Central Pacific Railroad, Sacramento.

Tickets for sale in all the Ticket Offices of the Central Pacific Railroad.

Assessment Notice.

LOS ANGELES IMMIGRATION AND LAND CO-OPERATIVE ASSOCIATION.

Principal place of business, Los Angeles, State of California—Notice is hereby given that at a meeting of the Directors held on the 22d day of November, 1875, an assessment of five dollars (\$5.00) per share was levied upon the capital stock of the corporation payable to the Secretary of the Association at its office, No. 1 Spring street, Los Angeles, immediately, and delinquent on or before

Thursday, December 23rd, 1875.

Any stock upon which this assessment shall remain unpaid on the 23d day of December, 1875, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold to satisfy the delinquent assessment together with costs of advertising and expenses of sale.

YOUNG MEN

Who may be suffering from the effects of

youthful follies or immoderation, will do well to avail themselves of this, the great-

est boon ever laid at the altar of suffering humanity. DR. SPINNEY will guaran-

tee to remedy every case of Gonorrhea, weakness, or private disease of any kind or character, which he undertakes and

guarantees to cure. He would therefore say to the unfortunate sufferer who may read this notice that you are treading upon dangerous ground when you longer delay in seeking the proper remedy for your complaint. You may be in the first stage of the disease, or you may be approaching the last, if you are suffering from the last, and are suffering some or all of the effects, re-

member that if you persist in procrastination the time must come when the most skillful physician cannot render you assistance when the door of hope will be closed against you, when no angel of mercy can bring you relief. In no case will the doctor fail of success. Then let not despair tempt you, upon your imagination, but avail yourself of the beneficial results of this treatment before your case is beyond the reach of medical skill, or before grim death hurries you to a premature grave. Full course of treatment \$25. Send money by Post Office Order or express, with full description of case. Call, or address,

DR. A. B. SPINNEY,

No. 11 Kearny St., S. F.
